

SUMMARY

Meticulous front-end engineer having 5 years of seasoned experience in software development. I'm passionate for developing modern, reactive, responsive, user friendly web applications and firm believer of mobile first approach. Adept at contributing to a highly collaborative work environment, finding solutions and determining customer satisfactions.

PROFESSIONAL EXPERIENCE

Frontend Developer, 01/2022 - Current

AVIZVA SOLUTIONS

- Developed the web application where brokers manage more than 1 million customers and their term insurance plans (Argus and Aflac).
- Rebuilt 4-year-old internal application in React JS 18 and use micro front-end architecture with full user experience redesign.
- Develop reusable and modular UI components utilizing ReactJs and Storybook, define accessibility and governance, and roll out the components across the 8 Portals of Avizva.
- Enhanced overall web application performance by optimizing the critical rendering path (CRP), reducing page load time, and improving performance metrics such as FCP, FMP, TTI, etc from 82% to 90%.
- Handling the interface layer (frontend) for integrating and tailoring the distributed microservice architecture with the web application and achieving static side generation and server-side rendering.
- Improved web application security by composing middleware to prevent various attacks such as CSRF, XSS, CSP, click-jacking, etc., which diminished the attacks from 7% to 4.2%.
- Implemented unit testing for the web application by increasing code coverage from 0% to 15%.
- Actively participated in design and code reviews and implemented web performance optimization techniques to improve performance from 50% to 70%.

Software Development Engineer, 02/2021 - 01/2022

ShineDezign

- Refactored the codebase and reduced the bundle size of the codebase from 300kb to 200 kb, which improved the load time from 4 s to 2.5 s.
- From scratch, I built a WebRTC project called Wiser for video calling with customers in React JS and Next JS using Twilio. Handling functionality like 1 to 1 calling and group calling less than 50 people.
- Assisted senior developers in performing code reviews and implementing improvement plans.

SKILLS

- HTML
- CSS
- SCSS
- Tailwind
- Javascript
- React JS
- Next JS
- Redux
- WebPack
- Restful-APIs
- Linux/IOS
- GitHub
- GraphQL
- W3C standards

Junior Software Engineer, 10/2019 - 01/2021

Busibud Solutions

- Create a web panel using Vanilla Javascript to conduct an online test for the hiring team.
- Build a pagination library for internal products to manage the data in tables.
- Revamped the frontend of a content management system application from PHP pages to React Web Components in MVC architecture for a content engagement platform provider, Naviga, which increased user engagement by 85%.

EDUCATION

07/2024

Post Graduate Diploma In Information Security

Indira Gandhi National Open University

05/2019

Bachelor Of Technology In Information Technology

Kurukshetra University, India
